MESSAGE FOR INSTITUTIONS

A big thanks to all the sites for the support getting T-Cell Project 2.0 up and running! And of course, thanks to the patients, without whom this research would not be possible.

After 2018, date of initiation of the study, the overall enrollment continues to grow, thanks to the progressive involvement of Institutions worldwide.

In the T-cell project 2.0, data are collected online at the Internet address <https://www.asclinicalresearch.org/TCell>. Crucial points for the effective success of the database are the completeness and accuracy of the data.

The Case Report Forms (CRFs) must be completed as close to a “real-time” basis as possible.
